

ARCONE®

HIGH DEFINITION TECHNOLOGY

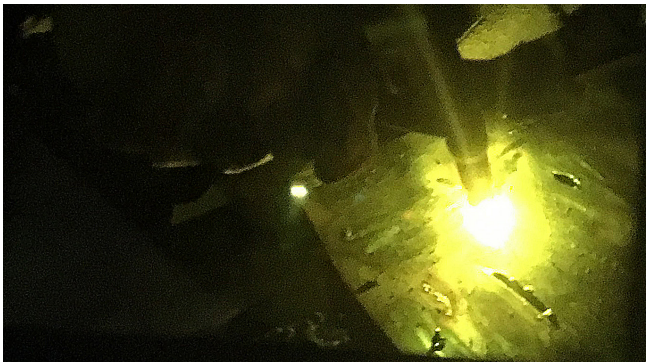

Certain ArcOne® Filters now have **High Definition Technology**, so welders can see colors in the light state like they've never seen them before. The High Definition Technology makes it possible to see your work while welding as clear as looking through a window. There are no washed out or disappearing colors with ArcOne® HD Lenses.

FILTERS WITH HD TECHNOLOGY:

S240-8, S240-9, S240-10, S240-11, S240-12, S450-9, S450-10, S450-11, S450-12, S540-9, S540-10, S540-11, S540-12, SS240, X81VX, 7000VX, 7500VX.

- Clear view of area surrounding weld
- Fits in ArcOne® welding helmets
- Constant UV/IR Protection
- Water and dust resistant construction
